Run ads for 4 months, fill seats for the whole year

An illustrative example of an admission-season ad campaign for a school in Vadodara

Parents choose a school mainly between **December and March**. If the school is not in front of them during this time, they choose another school, and the seat stays empty for the entire year. A short ad campaign in admission season can bring a full year of fees.

The investment (December to March)

Item	Per month	4 months
Facebook and Instagram ad spend (paid directly to Meta)	₹10,000	₹40,000
Fastgrows campaign management	₹5,000	₹20,000
Total investment	**₹15,000**	**₹60,000**

How enquiries can turn into admissions (example)

₹40,000 ad spend → **~260** parent enquiries (about ₹150 each) → **~50** school visits (1 in 5 enquiries) → **~12** admissions (1 in 4 visits)

What it can mean in fees (₹35,000 per student per year)

Scenario	Admissions	Fees in year 1	Return on ₹60,000
Cautious	4	₹1,40,000	2.3×
Moderate	8	₹2,80,000	4.7×
Good	12	₹4,20,000	7×

2
admissions cover the full ₹60,000 investment

₹1,75,000
fees from one child who studies for 5 years

12 months
of fees from 4 months of ads

No guarantee about admissions. These numbers are an example only, not a promise. Actual enquiries and admissions depend on ad budget, competition, the school's reputation and fees, and how quickly the school follows up with parents. Fastgrows's commitment is to run the campaign professionally, bring the school in front of local parents, and track and report every enquiry transparently.

Tip for best results: call every enquiry back within one hour and invite the parent for a school visit. Most admissions are won or lost at this step.
